

CHAPTER 91

WATER METERS

91.01 Purpose
91.02 Water Use Metered
91.03 Fire Sprinkler Systems; Exception
91.04 Location of Meters
91.05 Meter Setting

91.06 Meter Costs
91.07 Meter Repairs
91.08 Right of Entry
91.09 Separate Meter for Outside Watering
91.10 Meter Testing

91.01 PURPOSE. The purpose of this chapter is to encourage the conservation of water and facilitate the equitable distribution of charges for water service among customers.

91.02 WATER USE METERED. All water furnished customers shall be measured through meters furnished by the Water Department and installed by a licensed plumber.

91.03 FIRE SPRINKLER SYSTEMS; EXCEPTION. Fire sprinkler systems may be connected to water mains by direct connection without meters under the direct supervision of the Superintendent. No other open, unmetered connection shall be incorporated in the system, and there shall be no valves except a main control valve at the entrance to the building which must be sealed open.

91.04 LOCATION OF METERS. All meters shall be so located that they are easily accessible to meter readers and repairmen and protected from freezing.

91.05 METER SETTING. The property owner shall provide all necessary piping and fittings for proper setting of the meter including a valve on the discharge side of the meter. Meter pits may be used only upon approval of the Superintendent and shall be of a design and construction approved by the Superintendent.

91.06 METER COSTS. The full cost of any meter larger than that required for a single-family residence shall be paid to the City by the property owner or customer prior to the installation of any such meter by the City, or, at the sole option of the City, the property owner or customer may be required to purchase and install such meter in accordance with requirements established by the City.

91.07 METER REPAIRS. Whenever a water meter owned by the City is found to be out of order the Superintendent shall have it repaired. If it is found that damage to the meter has occurred due to the carelessness or negligence of the customer or property owner, or the meter is not owned by the City, then the property owner shall be liable for the cost of repairs.

91.08 RIGHT OF ENTRY. The Superintendent shall be permitted to enter the premises of any customer at any reasonable time to read, remove, or change a meter.

91.09 SEPARATE METER FOR OUTSIDE WATERING.

1. A customer may add a second water meter for the purpose of measuring water to be used from outside faucets and for outside watering that does not enter the public sewer system. The meter must be installed where it measures only the water on

outside faucets on the premises being served and the location of such meter must be approved by the Superintendent.

2. The second water meter must be obtained from the water department. The cost of the meter and its installation and maintenance shall be at the expense of the customer.

3. The amount of water used and measured by the second water meter shall be billed separately at the current water rate. There shall be no additional minimum usage charge for the second water meter. No sewer charge will be assessed for water usage measured by the second water meter.

91.10 METER TESTING. The Superintendent shall make a test of the accuracy of any water meter at any time when requested in writing. If it is found that such meter overruns to the extent of 5% or more, the cost of the test shall be paid by the City and a refund shall be made to the customer for overcharges collected since the last known date of accuracy, but not more than 5% of the total water bill and not for a longer period than 3 months. If the meter is found to be accurate or slow or less than 5% fast, the user shall pay a testing charge of \$100.00.
